MEMORANDUM FOR: Chief, Domestic Security Branch  
Physical Security Activities Division, OS

FROM:   
Community Counterintelligence and Security  
Countermeasures Office, IC Staff

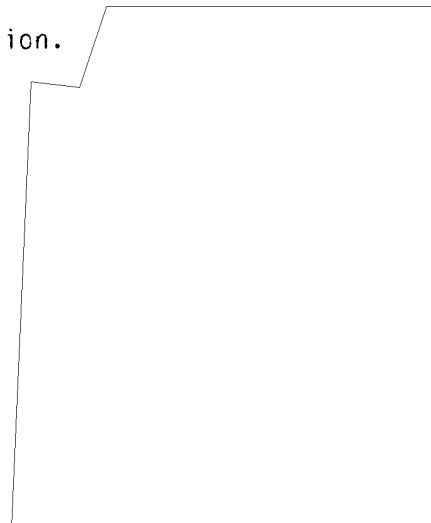

25X1

SUBJECT: Reconfiguration of Suite 1005, Ames Building (U)

This is to inform you of changes that have occurred in the reconfiguration of Suite 1005, Ames Building. Your survey officers had recommended that two walls be extended from false to true ceiling in the separation of our CCISCMO office space from the space for new occupants from ICS. Then, due to the press for completion of preparation for occupancy, the requirement was waived, with our concurrence. However, last week the ICS Logistics Officer was able to arrange for dry wall installation that completed the project as initially recommended. On the attached diagram, the walls A-B and C-D have been extended to true ceiling. This information is being provided to update your records of suite configuration.
